About Me

I'm a self-taught web developer and my passion is learning new technologies and building things. I love working on projects and coding every day. I also enjoy walking, watching series occasional gaming and drinking coffee, lots of it.

Experience

I currently don't have any working experience as a developer, but I do have 1 and a half years of experience developing and building things. I would love to work for a company where I can be a great asset, even if it means to start at the lowest level to keep learning and growing within the company to become a better developer. If I'm not brushing up on my Front-End, JavaScript or Back-End Skills, I am seeking good employment to further my knowledge and learning so I can grow to be better at what I do and be a great asset to the company that employs me. I am very trustworthy, loyal, hardworking, punctual, humble and creative. I also enjoy working in a team environment. Please contact me below to learn more and I will get back to you soonest!
