## COVER LETTER

### Hi There!

I'm Hylton and I am a very passionate developer with adequate knowledge of development processes and a quick learner keeping up to date with the latest in trends and technology. I'm a coffee lover and occasional gamer if I'm not brushing up on my development skills. I'm a very hardworking, punctual, loyal, humble, creative, professional, intelligent developer and great person by heart. I'm looking to kick start my career at a great company, not only to grow and be the best developer for them in a short amount of time, but also to be a valuable asset for them in their future projects and challenges.

I'm a great achiever that puts mind to matter and gets the job done effectively and efficiently. I have over 3+ years of developing and designing experience and I am ready to put it to good use. I strongly believe that I will make a significant difference in your company if you give me the opportunity to prove myself. I would love to meet with you for an Interview or just have a chat whenever possible. Feel free to look at my latest projects at <https://hyltonjean.github.io> and don't hesitate to get in touch with me above.

Looking forward to meeting with you.

Sincerely yours,

Hylton J. Walters

*H.J. Walters*
