About Me

I'm a self-taught web developer and my passion is learning new technologies and building things. I love working on projects and coding every day. I also enjoy walking, watching series and drinking coffee, lots of coffee.

Experience

I currently don't have any working experience as a developer, but I do have 1 year experience developing and building things, which you can have a look at below on my website. I would love to work for a company where I can be a valuable asset, even if it means to start as an intern and keep learning and growing within the company to become a better developer.

I am very trustworthy, loyal, hardworking, punctual and creative. I also enjoy working in a team environment. Please contact me below for any position you have available and I assure you that you won't be disappointed!
